

# BEER

Our guest beers include some breweries local to home and some a bit further afield. All have been carefully selected by our beer sommelier Jamie Percival. He is our resident beer geek and if you want to find out more about the beers or the brewery, seek him out and he will be only too pleased to share his knowledge!

Craft beer is rich in flavour and diversity, and if there is one thing that we have learned over the last nine years it is that everyone has their own tastes and palate. In the beer lists below we have provided a guide to the style, abv, colour and hoppiness, but have left space for you to write your own tasting notes.

## Craft Keg Beers

Sambrook's craft ale and keg beers are situated in the middle of the bar with our guest beers on either side. Joining Sambrook's craft keg beers we have Neckinger Lager, brewed by a new brewery – Lost Rivers.
